

GLOBO

HYDRO POWER

green technology working for you

Globo Hydro Power™

“GHP”

A fuel enhancing process that cleverly compiles known science from as far back as the 1960's with proven technologies reported on from National and International Universities, Testing Authorities and NASA

Globo Hydro Power™

is a

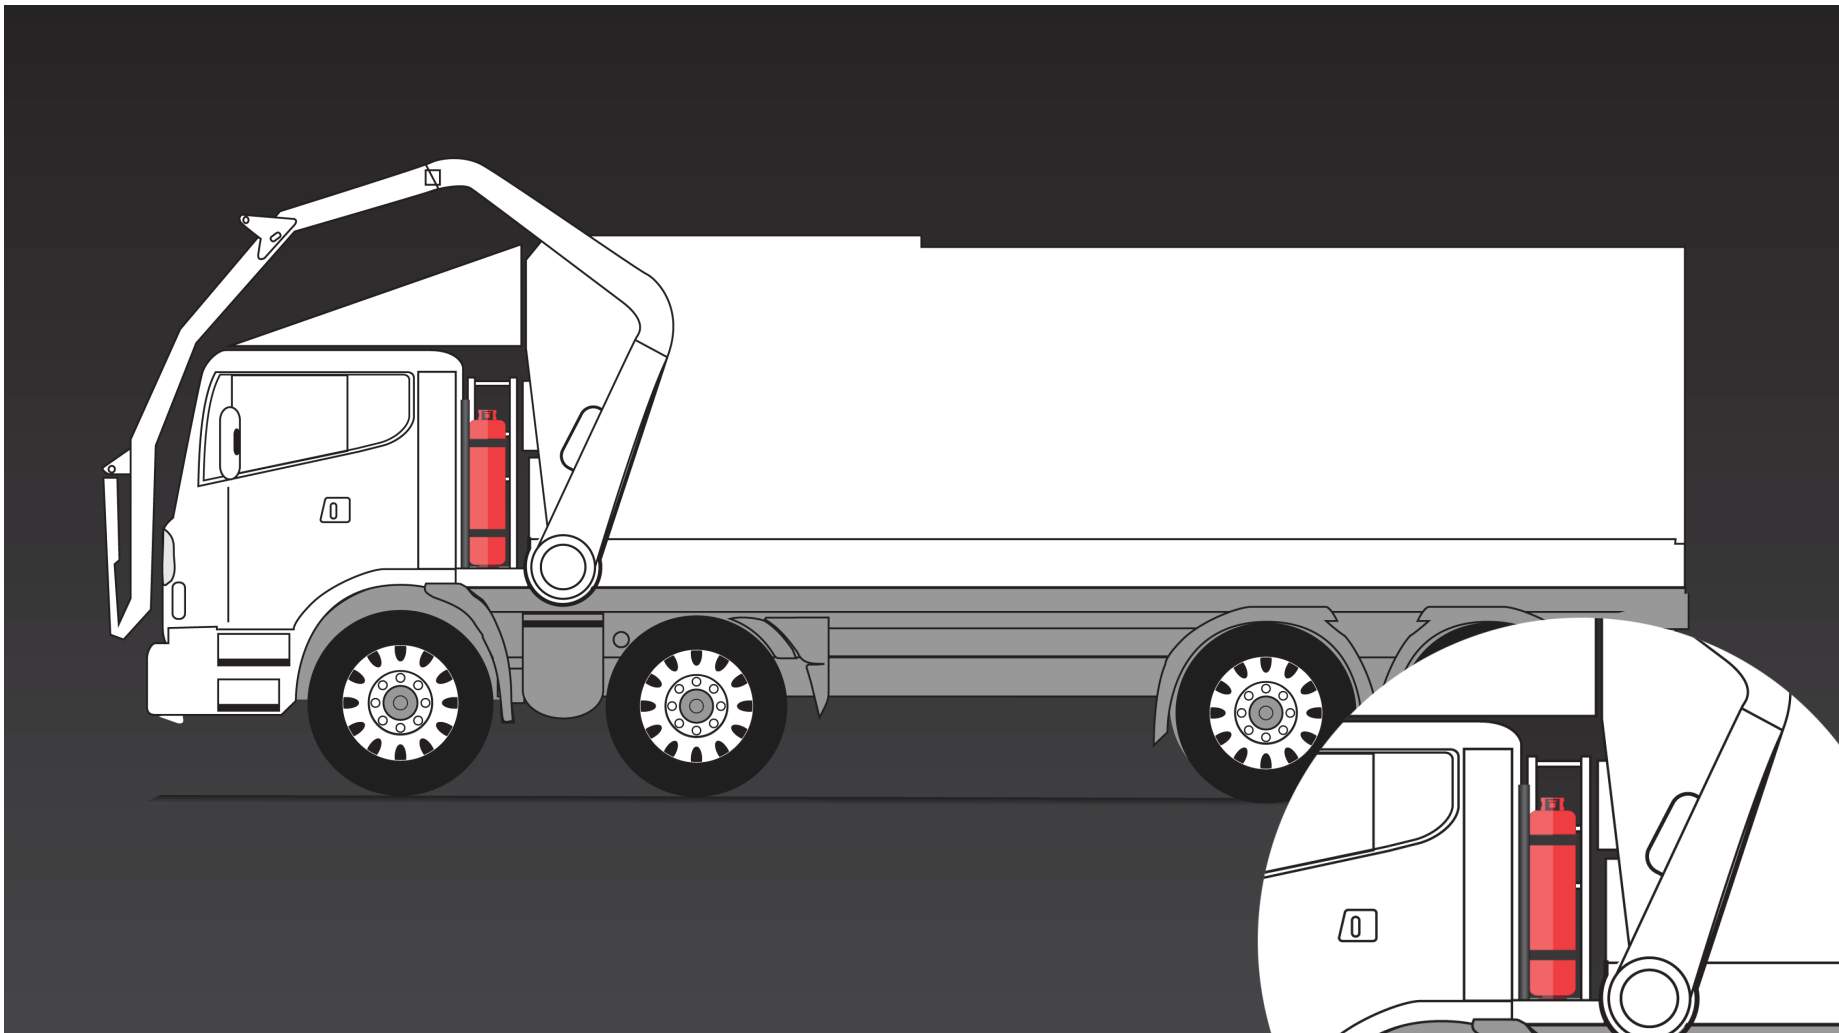

Fuel Enhancer

it is not

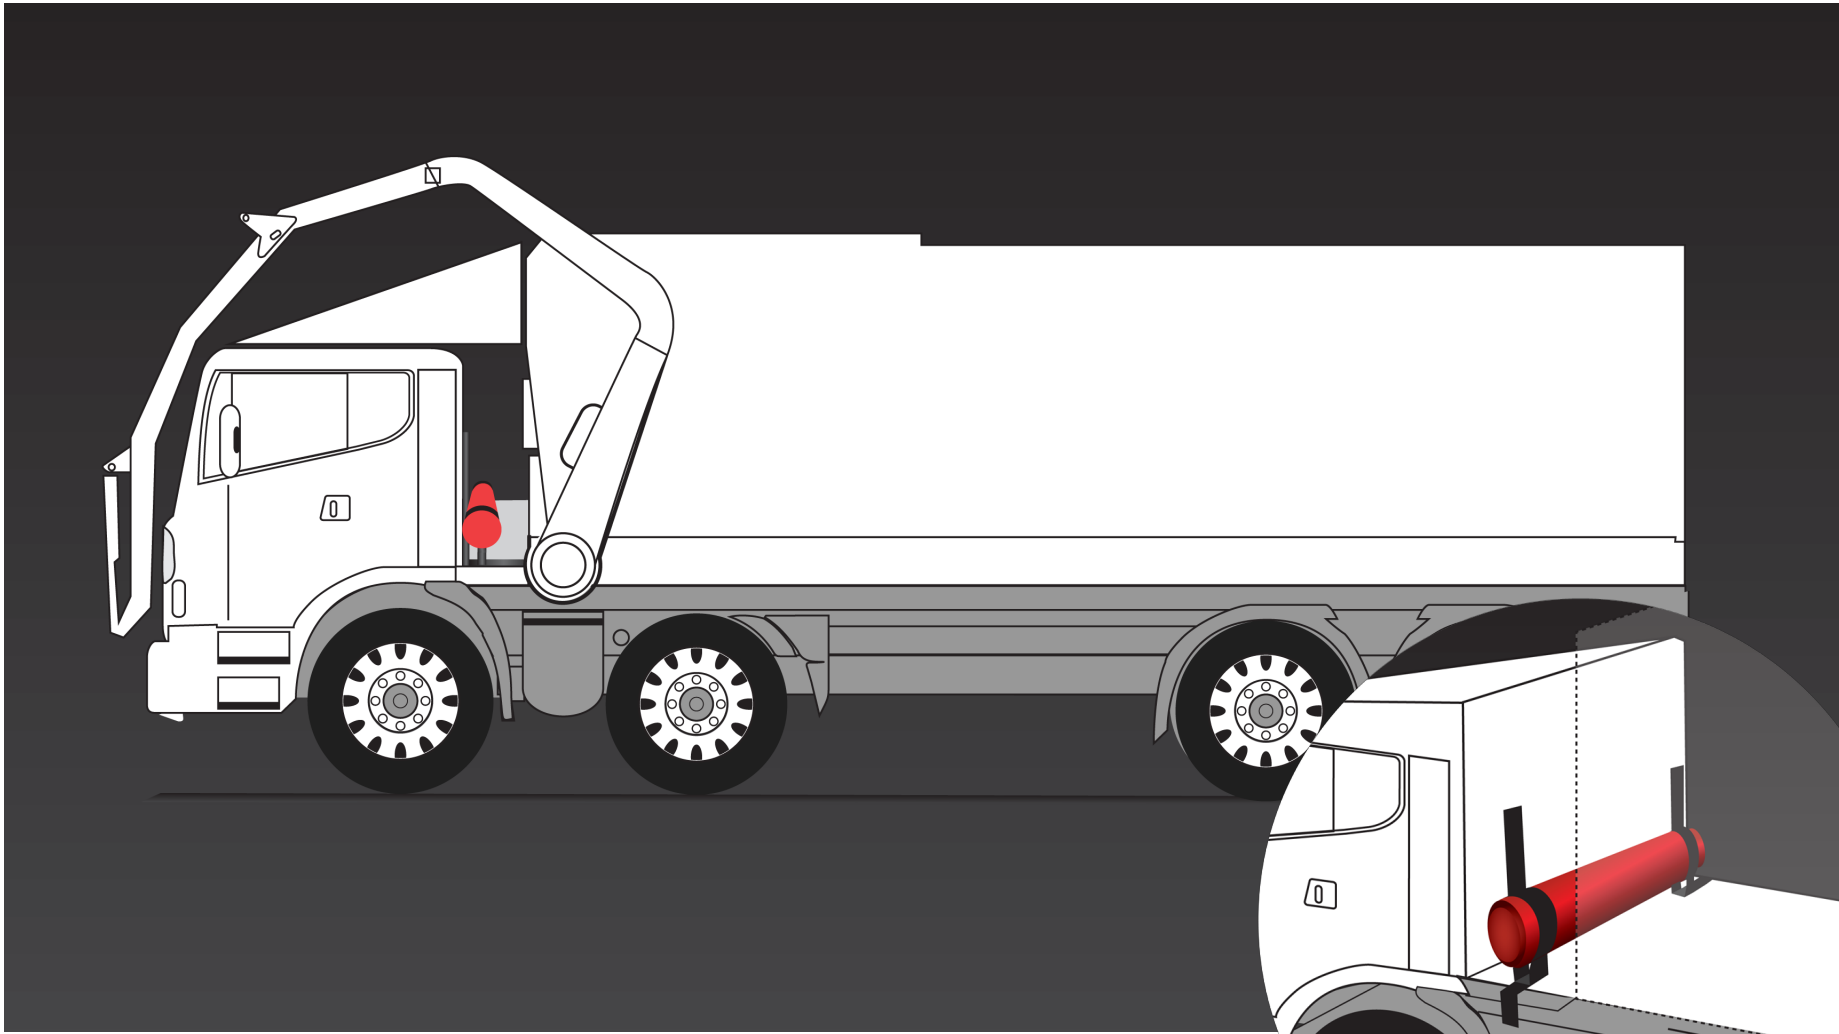

An Alternative Fuel System

Note

Exchangeable cylinders of Compressed Hydrogen Gas are conveniently fitted onto a vehicle becoming part of The Vehicles Operating System

Globo Hydro Power™

Globo Hydro Power™

Hydrogen Gas Cylinders are fabricated of Mild Steel

a metal that withholds hydrogen gas molecules
other metal fabrications permit seepage

Note

- Cylinders are Colour Coded **Red** to indicate Hydrogen Gas
- Cylinders are Left Hand Thread Connections unique to Hydrogen Gas
- Cylinders are ISO EN 12205 – 2001 / TPED 99/36 CE Standards Compliant

**Hydrogen Gas Cylinders
filled to an internal pressure of
200 Bar
thereafter**

**the transfer pressure through the hosing lines into the engine
becomes approximately 5 Bar**

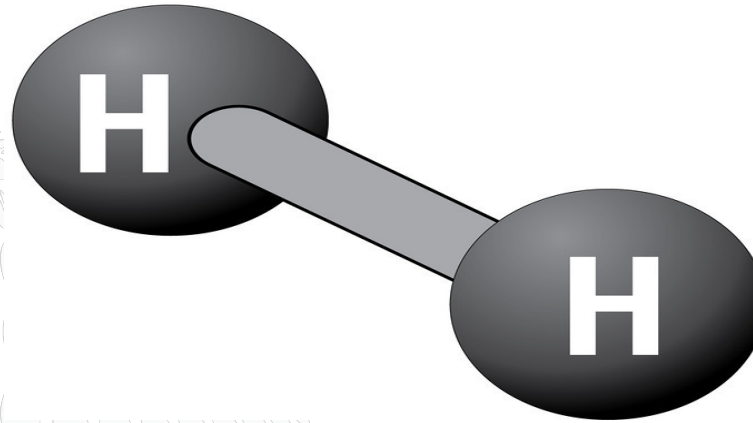

**Hydrogen Gas Flow
is controlled by a 2 Stage Regulator maintaining flow rate
consistently
Regulator is ISO 2503 Design Standard Compliant**

**An Exact Literage
into an
Engine's Air-Intake
is
A Stoicmetric Formula
according to
Engine Type and Engine Size**

**Pressure Regulators
reducing
Hydrogen Gas Cylinder Pressure
into
The Engine
are fitted with a
Safety Release Valve that will Dump All Gas Immediately if a
Cylinder becomes Unstable**

Pressure Regulators
reducing
Hydrogen Gas Cylinder Pressure
into
The Engine
are fitted with a
Flame Arrestor preventing Back Flow
from
An Engine Spark
to
The Hydrogen Gas Cylinder

Hydrogen Molecule

**Hydrogen Gas Molecules
are
3 times lighter than
Helium**

Note

Any gas vented from the Storage Cylinder will rise and dissipate naturally and quickly into the atmosphere unlike other Fuels (LPG/Diesel) that pool and lay low around the location of a gas leak.

Product Development and Design Engineering

Globo Hydro Power™

Insurance Coverage is provided under the auspice of

Company Products Liability Insurance

Installation Kit Parts and Fittings Suppliers

Globo Hydro Power™

utilises

Industry Name Brand Suppliers

for Quality, Safety and Reliability Assurance

Product Installers

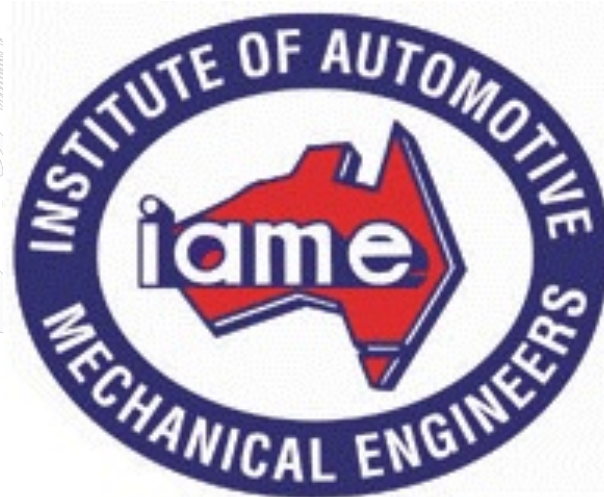

Globo Hyaro Power™

Product Installers

are

**Member Grade (Examination Qualified) IAME
Members**

Product Installation Inspections

Globo Hydro Power™

Product Installation Inspectors

are

Member Grade with > 25 Years Industry Experience

Randomly Inspecting

1 in 25 Product Installations for Correctness, Safety and Compliance Adherence

Automotive After – Market Products

MEMBER

Globo Hydro Power™

as a

Fuel Enhancer is an Automotive After – Market Product

Automotive After – Market Product Fitments does not void a Manufacturer's Warranty

but

if mechanical repairs are necessitated due to the fitment of an Automotive After – Market Product

then

mechanical repair costs will be the payment responsibility

of the Automotive After – Market Product Developer /Designer

as is standard business practice with

Scania, Mercedes Benz, Volvo, Cummins, Man, Isuzu

Engine Manufacturers

Statutory Product Warranty

green technology working for you

Globo Hydro Power™

1 Year Product Warranty Coverage

is provided to all Customers

Engine Consequential Loss Warranty

green technology working for you

Globo Hydro Power™

Extended Engine Repair Warranty

is provided to all Customers
under
Company Products Liability Insurance
